Hydraulic Institute and Valve Manufacturers Association Presents Virtual Market Outlook Workshop

Gain insights from end-user market experts that you can use to plan, prepare and succeed.

Parsippany, NJ, June 28, 2021 - Hydraulic Institute (HI) and The Valve Manufacturers Association of America (VMA) announce the 2021 Virtual Market Outlook Workshop, taking place virtually, August 5 – 6.

The Market Outlook Workshop is open to members and non-members of both organizations and brings together global and national economic experts, as well as experts who research and follow the economic indicators for end use markets important to the fluid handling and flow control industries.

Industry experts will address economic trends and outlook, energy markets, infrastructure and specialized markets. New segments added to the program this year include hydrogen, mining and pharmaceutical.

“The Market Outlook Workshop continues to be the go-to event for providing valuable market insights to pump and valve professionals responsible for strategy and forecasting. HI is pleased to continue our partnership with VMA to provide access to industry experts to our industries.”, says Michael Michaud, HI Executive Director.

This event is open to anyone in the industry, and is ideal for those in the flow control or fluid handling industries looking for a greater understanding of how economic, societal and other implications from the events of 2020 and 2021 impact different market segments and their business.

Registration is now open: <https://bit.ly/MOW-2021>
